

NOTICE FROM THE O5 COUNCIL | LEVEL-5 ETHICS COMMITTEE CLEARANCE ONLY

To all personnel,

Last month, the Foundation faced a challenge, not unlike any of the challenges it faces every day. Two of the men who many are supposed to look to as the first among them, the leaders of the people, the bastions of Foundation ideologies were corrupted. One by an anomaly, the other by greed and vice. Let it be known that this will not stand.

Any other place of employment would not name names, but the Foundation is not any other place of employment. Assistant Director Elliot Goode and Director Thomas Graham of Site-17 were the two afflicted personnel. Let it be known that the Foundation will not tolerate similar behavior in its personnel, be they a lowly Level-1 Janitor or a Level-5 Director of a Site. This reckless behavior on behalf of Goode and Graham cost the lives of several Foundation employees, who will not be named out of respect for them, as would be the norm in any other place of employment.

The anomaly which finds itself at the center of this series of unfortunate events, SCP-953, is being transferred to a *Classified Facility* as per O5 Council order. This is due to the nature of the loss of one anonymous employee. It is known that there is a dissentious party within Site-17 seeking to harm SCP-953 for their own benefit. For those unaware of the nature of this corruption, SCP-953 was tortured extensively over a months-long period of time by Goode and Graham in the most egregious abuse of Foundation resources since SCP-2700-EX.

Thomas Graham was a cancer, but hardly a unique one. There are doubtless many more men and women just like him in the Foundation, waiting to spread throughout our organisation and poison all that they touch. And it is our duty, as always, to pluck them from the meat and cast them away. The Foundation cannot afford to look weak in the eyes of the Coalition, especially not now. We must remember that humanoid anomalies are just as dangerous as any other anomaly under containment. They are to be treated with as minimal interaction as possible to reduce sympathy by Foundation personnel. It is, however, just as important to remember that though we are not to befriend them, we are not to antagonise them either.

Humanoid anomalies are simply another number.

Nothing more, nothing less.

Secure. Contain. Protect.
