

HELENA WALKER - ETHICS COMMITTEE CASEFILE

Helena Georgia Walker was born on March 25th, 1986 in Lincoln, New Hampshire. Walker received a private education, where she maintained a high GPA, and headed her school's debate team. She was accepted into Tufts University in 2003, and managed to graduate with a BS in Criminal Psychology within 6 semesters. Interviews with Walker's thesis advisors indicate she was interested in becoming a criminal prosecutor, or possibly joining the FBI, if given the opportunity.

The Global Occult Coalition became aware of Walker in 2008, when information she had proposed in her undergraduate thesis, *The Means and Motives of Anti-Fragging Terrorism in New York*, allowed GOC agents to successfully identify and liquidate an anomalous ecoterrorist ring operating in Pennsylvania and upstate New York. Although the conclusions drawn in Walker's paper were ultimately inaccurate, it is believed Walker would have been capable of solving the case herself had she been aware of the existence of the veil, and been given access to the GOC's files on the case. Walker was approached by GOC officials with an offer of employment in November 2008, which she accepted within a week.

During her tenure as a GOC agent, Walker was rarely assigned fieldwork; Her specialty was largely administrative, coordinating large scale investigations, including some operations where the GOC worked with the Foundation or American Intelligence Agencies. Despite this, Walker is credited with solving approximately 5.4 cases per year. Interviewed coworkers have noted that she was generally hard working, driven, and had extremely good people skills, though all claimed to know nothing about Walker's personal life.

ETTRA and Employment within the Foundation:

In late 2022, after 14 years of employment with the GOC, Walker requested to be transferred to the Foundation's recently created ETTRA unit. Foundation and GOC ambassadors were enthusiastic about the idea, due to Walker's previous work as liaison between the two organizations, and the lack of experienced bureaucrats within ETTRA's ranks. Walker was officially transferred to ETTRA on January 15th, 2023, and was quickly given the role of Head of Coordinations, giving her significant power within the organization.

While Foundation ambassadors had hoped Walker would take a more even-handed approach in her work, it quickly became apparent that Walker's sympathies lied entirely with ETTRA's modus operandi. Foundation employees who communicated with Walker regularly complained about veiled threats, and an unwillingness to compromise. To

date, two ethics committee investigations have been launched into Walker's behavior. While she received an official warning for inappropriate or abusive language towards other employees, neither investigation was able to determine that Walker was involved in any behavior which violated the limitations of her position.

Involvement in Unauthorized Neutralization Conspiracy:

While Walker was not the puppetmaster behind ETTRA's campaign of unauthorized neutralizations, her involvement was far from negligible. Her administrative experience was a weapon she wielded to covertly transfer SCPs not designated for neutralization into ETTRA's custody, without the knowledge of Foundation officials. With the evidence presented below, I intend to prove Walker was directly responsible for the acquisition of at least 37 contained SCPs, as well as hundreds of minor anomalies which lacked official SCP designations; Helena Walker is guilty of treason, the impersonation of Foundation officials, unauthorized transfer of anomalies objects, and the unauthorized termination of anomalies.

Evidence:
