

## DIARY ENTRY CROMWELL/091325-01

- Lieutenant Simon Cromwell | Junior Supervisor

[BEGIN LOG]

Site-17, the greatest hotpot of Foundation ethical violations. Rows and rows of cells filled with humanoid anomalies. Highly regulated, rarely enforced.

I read somewhere that Site-17 is currently doing very well for themselves, unlike most other Sites. Good for them, I suppose?

It just has me wondering though. I can't shake it, and I don't know if it's just me being obsessed.

Ever since the GOC took over after the 2011 Arlington Summit, every facility in this Foundation went over a few bumps. Lay-offs, restructures, reassignments, changes in procedure. A lot of those scars still show until today.

But Site-17? It's not just running, it's *thriving*.

Am I just being paranoid?

What is going on in Site-17?
